

Improving Lives. Every Time. Every Touch.

About Us

From our roots in strawberry fields, North Oaks has grown from a single hospital to a comprehensive health system, delivering state-of-the-art care. As an independent, community-owned hospital organization, we are purpose-driven and dedicated to reinvesting every dollar into our people, technology and facilities. We believe that the health of our region is our greatest legacy.

“At North Oaks, we’re more than a team. We’re family united by a calling to serve others. Every role matters, and together, we bring hope, healing and expert care to our community.”

Michele K. Sutton, FACHE • President & CEO, North Oaks Health System
